## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 8-20 allowed.
2. The following is a statement of reasons for the indication of allowable subject matter: Prior art failed to establish the required configuration of diffracting the optical signal to form a predesignated optical radiation pattern.
3. Claim 4 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-3 and 5-7 rejected under 35 U.S.C. 102(e) as being anticipated by Lefebvre et al. (6,595,671)

Regarding Claims 1-3 and 5-7, Fig. 6-8 disclose optical emitters 3, diffracting/reflection element 13 are all encapsulated completely with light transmissive resin material 1.
